

HIMA's Specialist Qualification Program

As the pioneer of electronic safety systems, HIMA has over 35 years of experience in the delivery of fully engineered safety solutions to their customers. We have recognised the need to ensure organisations that integrate our systems should have the appropriate qualifications and competencies to deliver the same level quality safety solutions using HIMA technology.

With this in mind, HIMA have developed the Specialist Qualification Program (SQP) for companies with the personnel, procedures and experience to carry out the successful implementation of HIMA equipment utilising their own Quality Assurance system.

What HIMA can offer you

- Training program for your selected staff (five days) at a nominal charge
- Discounts for additional training if required
- Appropriate software licence(s) for logic generation
- Accreditation as a HIMA Qualified System Integrator
- Product presentation slides
- Priority hardware delivery during staging and commissioning
- Documentation examples
- Quotation support
- Access to HIMA Service and Support

SQP PREREQUISITES

- Must provide at least two personnel for the training program
- Must nominate a principal safety systems engineer to act as the relationship manager with HIMA
- Independently verified Quality Assurance system
- Site installation, service and commissioning experience
