

Can you prove your functional safety competency?

Enrol in the HIMA facilitated TÜV Functional Safety Program

Brisbane 8 - 11 December

As a professional involved with functional safety, your ability to demonstrate competency in this subject is taking on greater importance and is being driven by safety standards such as AS61508 and AS61511.

The HIMA facilitated TÜV Functional Safety Program will provide you with valuable skills and knowledge which can be used in your daily activities and also includes TÜV approved certification on successful completion of a final exam.

The course has been developed to provide an overview of current industry standards, functional safety concepts and current tools used to determine safety levels while applying industry recognised techniques and methodologies.

Eligibility pre-requisites apply.
